

Discreet

Fresh New look, Same Great Design.

Discreet leg bags are contoured to give an improved fit with a neutral colour, offering a less clinical look and reducing the visibility of the bag under clothing. The range has now been updated keeping the same popular features but adopting an improved look.

Contoured Fit

Offers an improved and comfortable fit while distributing urine evenly.

Easy to Operate, Leak-Free Tap

180°, two stage action tap. Easy to operate and reduces the risk of accidental opening.

Selection of Tube Lengths

Short and Long tubes are available in 350ml, 500ml and 750ml with an additional adjustable length available in 500ml.

7cm / 2 ¾ inches

30cm / 11 ¾ inches

60cm / 23 ¾ inches

Neutral Colour

Neutral colour and print reduces the possibility of bright colours showing through clothing.

Needle-Free Sample Port

Easy to use needle-free sample port with a smooth, contoured exterior, reducing potential marking of the skin and visibility under clothing.

Date Box and Use

Clear indications of use and a date box have been added to allow information to be recorded and length of use monitored.

Updated Brand and Packaging

Our urology product range is updating to a new look, with multilingual packaging and instructions.

Community Packs with Fabric Backing

leg bag

The Flexicare leg bag range has been updated with a fresh new look and improved features to meet all patients requirements. Available in 350ml, 500ml and 750ml capacities the range is now contoured for a better and more comfortable fit.

New Contoured Fit

The new contoured shape of the leg bag provides a more comfortable fit, while distributing urine evenly.

Clear Grey Print

The new grey print is clear and easily visible, allowing measurements and information to be read with ease.

Easy to Operate, Lever Tap

180°, two stage action tap. Easy to operate and reduces the risk of accidental opening.

Date Box and Use

Clear indications of use and a date box have been added to allow information to be recorded and length of use monitored.

Needle-Free Sample Port

Easy to use needle-free sample port with a smooth, contoured exterior, reducing potential marking of the skin and visibility under clothing.

Stepped Connector

The stepped connector remains offering secure and reliable connection to catheters and drainage bags.
